Dear Hiring Manager,

I am writing to express my strong interest in the Junior Web Developer position that your company has recently advertised. I am eager to start my career in web development and believe that my skills, education, and passion for coding make me a great fit for this role.

As a current student of Computer Information Technology at Lethbridge College, I have acquired a solid foundation in web development principles and practices, with a particular focus on front-end technologies. In addition, I have pursued self-education through various online courses such as freeCodeCamp, edX, and CS50's Harvard course, which has allowed me to develop strong skills in HTML, CSS(SCSS), JavaScript, and React.

Furthermore, I am a highly motivated and detail-oriented individual with excellent time management skills, a strong work ethic, and a desire to learn new things. I am also a great listener and am always willing to collaborate and contribute to the success of the team.

My experience includes several well-prepared and modernly adapted projects, which can be found on my GitHub account (https://github.com/OleksandrShakhov). I have also earned certifications in Responsive Web Design from freeCodeCamp and CS50's Web Programming with Python and JavaScript.

I am excited about the opportunity to bring my skills and passion for web development to your company and contribute to its success. Thank you for considering my application. I look forward to hearing from you soon.

Sincerely,

Oleksandr Shakhov
